What is WatchTVEverywhere?

WatchTVEverywhere has a lot of different definitions. For us, it is TV programs that are available on something other than a TV set. That means your PC, laptop, iPad, iPhone or Android.

How is WatchTVEverywhere different from something like Hulu or Netflix?

There are several differences. WatchTVEverywhere:

- Is FREE. There is no extra charge to use it. You only need to have a subscription to the network you want to watch.
- Includes live TV. For example, WatchTVEverywhere includes live game coverage on NFL Network or WatchESPN. Hulu and Netflix only provide previously recorded shows.
- Has full episodes of current TV shows. For example, the episodes of *Chrisley Knows Best* or *Covert Affairs* on USA are available within days of their premiere on USA. You can also catch up on the entire season or previous seasons of your favorite shows.

How much does it cost?

Nothing. At this time, there is no extra cost for WatchTVEverywhere so feel free to explore. There is nothing available at this site that will result in an extra cost to you (except overage charges from your cellular carrier). You only need to be a subscriber to the TV network. This may change over time depending on the requirements made by the individual TV networks.

Where can I WatchTVEverywhere?

The answer is just about Everywhere. WatchTVEverywhere works anywhere you can receive an Internet signal: inside your house, at the office, shopping mall, hotel, airport, vacation home, etc. Wired connections and in-home WiFi will provide the best quality. The quality of WatchTVEverywhere signals while roaming (airports, stores, etc.) will vary depending on the strength of the signal. Be extra careful when you travel, especially outside the US. Data roaming charges may apply and access outside the US can be very expensive.
